Classroom discussion workflow software

FLOWSTACK DISCUSSION

Classroom discussion for posts, replies, and review.

Give teachers a focused discussion workflow without asking students to navigate a larger learning platform.

5

class sections

125

students per
workspace

7 days

trial before
monthly or
annual billing

WHAT IT HELPS TEAMS DO

Guide prompts, first posts, and peer replies.

- **Create prompts:** set structured questions for assigned classes.
- **Require first posts:** students submit before viewing peer responses.
- **Support peer replies:** students build on classmate ideas after posting.
- **Review progress:** teachers see participation, completion, and attention signals.

BEST FIT

For lightweight classroom discussion routines.

- **Teachers:** keep setup, participation, and review in one focused place.
- **Students:** post first, then read and reply to peers in their assigned class.
- **Pilots:** try synthetic discussions before opening a real class workspace.
- **Growing classes:** add sections and students, or request invoice support.

PROMPTS

Teacher-led discussion setup

Create structured discussion prompts for assigned classes.

PARTICIPATION

Posts and replies

Guide students through first posts, peer replies, and completion expectations.

REVIEW

Progress visibility

See participation, completion, and attention-needed signals without a full LMS.

PLANS AND CAPACITY

Start with guided discussion, then expand when participation grows.

- **Teacher Pro:** \$18/month or \$144/year, with a 7-day trial before monthly or annual billing from Account.
- **Included capacity:** up to 5 class sections, 125 students per workspace, and one teacher/admin.
- **Room to grow:** add +1 section and +25 students, add +25 students, or use School / Department invoice support.
