Student movement workflow software

FLOWSTACK SCANNING

Student scanning for passes and work shifts.

Run a simple scan-in and scan-out workflow for student movement, active status, and completed scan history.

5

class sections

125

students total

7 days

trial before
monthly or
annual billing

WHAT IT HELPS TEAMS DO

Track scan-in, active status, and history.

- **Scan in:** start a bathroom pass or work shift with a student ID.
- **See active status:** know who is currently out or working right now.
- **Scan out:** close the record when the student returns or finishes.
- **Review history:** filter completed records by student, block, time, and type.

BEST FIT

For simple school movement records.

- **Classrooms:** run a scan workflow without turning movement tracking into paperwork.
- **Staff visibility:** check active and completed scan records in one dashboard.
- **Pilots:** use synthetic students and scan IDs before opening a workspace.
- **Growing classes:** add sections and students, or use invoice support for larger needs.

MOVEMENT

Bathroom pass and shift logs

Start and close movement records with a student scan workflow.

STATUS

Active view at a glance

See current out or working students without digging through paper logs.

HISTORY

Completed records

Review completed scan records by student, block, time, and record type.

PLANS AND CAPACITY

Start with one class, then grow into paid workspace tools.

- **Teacher Pro:** \$18/month or \$144/year, with a 7-day trial before monthly or annual billing from Account.
- **Included capacity:** up to 5 sections and 125 students total, with no per-section student cap.
- **Room to grow:** add +1 section and +25 students, add +25 students, or use School / Department invoice support.
